

INTERNSHIP REPORT PRESENTATION

Task2Grab – Web Development & UI/UX

Ayush Agrawal • B.Tech CSE (AI/ML) • IILM University, Greater Noida

Intern – Web Development • Monetize Info LLP • 10 June 2026 – 10 July 2026

About Monetize Info LLP & Task2Grab

Monetize Info LLP

Monetize Info LLP is the parent organization behind Task2Grab, a task-based rewards platform.

Task2Grab Platform

Task2Grab enables users to earn rewards by completing incentivized tasks — app installations, sign-ups, and dynamically available campaigns. Task completion is verified through postback-based tracking to ensure accurate reward crediting.

→ Login & Authentication

→ Browse Available Tasks

→ Complete Task

→ Postback Verification

→ Reward Credited

Internship Objectives & Team Environment

Objectives

Gain practical web development experience

Convert design requirements into functional UI

Improve responsive UI/UX

Understand authentication workflows

Handle dynamic task content

Collaborative software development

Team Structure

I worked under a **Team Lead** who managed the main project and assigned smaller development tasks to each intern.

My Role & Contribution

Primary Contribution — Task2Grab Website

01

Login Page — Authentication interface and user-friendly layout

02

Home Section — Dynamic task content and responsive layout

03

Responsive UI — Adaptable, device-friendly interface

04

UI/UX Improvements — Design implementation and visual consistency

05

Authentication — User authentication-related workflows

06

Dynamic Task Content — Presenting dynamically available campaigns

Mobile Contribution: I also contributed to selected parts of the Task2Grab mobile application using React Native, implementing UI improvements where assigned. My primary responsibility was the Task2Grab website.

Task2Grab Website Development

Login Page

- Authentication interface implementation
- User-friendly, clean layout
- UI consistency with platform design

Home Section

- Available task presentation
- Dynamic task content display
- Responsive layout structure

UI/UX Improvements

- Design implementation from references
- Responsive interface adjustments
- Usability and visual consistency

From Figma Design to Responsive UI

My work involved translating design requirements into functional interfaces while focusing on responsiveness, usability, and visual consistency across the Task2Grab website.

Responsive UI

- Adaptable layouts for multiple screen sizes
- Consistent usability and clear content presentation
- Device-friendly interface

Dynamic Tasks

- Campaigns and tasks change dynamically
- Interface accommodates changing content
- Tasks presented clearly to users

Technologies, Tools & Mobile Contribution

Tools & Technologies

React Native 0.79.5

Mobile application framework

VS Code

Primary development environment

Git & GitHub

Version control and collaboration

Figma

Design references and UI specs

Android Build 35.0.0

Target build version

Mobile Application Contribution

Although my primary work was on the Task2Grab website, I also contributed to selected parts of the mobile application using React Native.

- UI development and improvements where assigned
- Selected mobile application components

❏ Wallet system, API connections, navigation, and AsyncStorage were handled by other interns — not part of my responsibilities.

Challenges & Learning Outcomes

Challenges Faced

Building responsive interfaces across screen sizes

Handling dynamically changing task content

Maintaining consistency between designs and implementation

Understanding an existing project structure

Completing assigned tasks within a team workflow

Learning Outcomes

- Practical web development experience
- Improved UI/UX implementation skills
- Responsive design and layout techniques
- Understanding authentication-related workflows
- React Native mobile development exposure
- Git/GitHub version control workflow
- Team collaboration under a Team Lead

INTERNSHIP COMPLETION

Internship Completion

During my internship at **Monetize Info LLP**, I gained practical experience in web development, responsive UI/UX implementation, authentication-related workflows, dynamic task interfaces, selected mobile development, and collaborative software development.

Organization

Monetize Info LLP

Role

Intern – Web Development

Duration

10 June 2026 – 10 July 2026

Thank You

Ayush Agrawal · B.Tech CSE (AI/ML) · IILM University, Greater Noida
